

Movilitas Accelerator

For SAP Advanced Track & Trace for Pharmaceuticals (ATTP) - Archiving

Data archiving is an important step to pull out mass data from the database that is no longer required in the system but must be kept in a format that can be analyzed. For all archiving objects of Advanced Track and Trace for Pharmaceuticals (ATTP), the data archiving concept is based on the Archive Development Kit (ADK). Due to the very high volume of data that is expected to be stored and processed in the ATTP systems, a data lifecycle strategy is seen as crucial to achieving the following goals:

- Improved system performance and response times
- Lower hardware and administration costs
- Greater system availability due to reduced down-time during release upgrades
- Compliance with any regulatory or audit requirements
- Reduced liability risk
- Reduced online residency requirements with transparent retrieval

Simplify and Accelerate with Movilitas

Starting your archiving project from scratch requires extensive conceptual efforts and testing that can delay and increase risks. Leveraging pre-defined SAP templates expedite the archiving project, reduces overall costs, and increases solution quality.

BLUEPRINT

up to **80%** savings due to predefined processes

IMPLEMENTATION

up to **60%** savings due to preconfigured templates

TEST & STABILIZATION

up to **30%** savings due to less custom implementations

The Movilitas Accelerator Package offers a full set of pre-configured processes and functionalities. They are based on industry standards, best practices, and a proven implementation approach.

Faster time to value

A safe starting point for serialization and Track & Trace

Based on fit-gap analysis

Flexibility to make specific adjustments as your operations change

Ensure global regulatory compliance

Secure product and brand integrity

Benefit from fixed price Accelerator packages to save up to 60% compared to a start from the scratch Archiving project implementation. All packages are compatible with all ATPP feature pack release versions.
